

1D MGSE

for PocketQubes (1P, 2P, 3P)

by MURB Space

1D MGSE for PocketQubes: features & options (MY2020)

The 1D MGSE is a device created to both facilitate and shorten the assembly process while satisfying the quality requirements. The 1D MGSE for PocketQubes is compatible with the PocketQube Standard — 1P, 2P, 3P. It allows you to mount and rotate the satellite in 1 axis. It shortens the procedure of manipulating the satellite when you perform manual activities, such as mounting the components inside the satellite and performing tests.

Main benefits from using the 1D MGSE:

- Improving safety during integration and testing
- Reducing time and cost of the assembly process
- Rotating satellite around the vertical axis

Feature	1D MGSE for PocketQubes
1 Degree of Freedom	Yes
Locking mechanism (1 axis)	Yes
Horizontal and vertical mount	Yes
Adapter compatible with 1P, 2P, 3P	Yes
Custom mounting holes	Optional
Grounding	Optional (recommended)
Anodized surfaces	Optional

How to get your 1D MGSE for PocketQubes?

We believe that keeping the delivery process simple makes our 1D MGSE more accessible.

This is the reason why we do our best to keep the things as simple as possible.

Most of the components of the 1D MGSE are standardized. However, we care about your needs, thus we want to understand the details of your request and to create the right solution for you.

Phase 1: RFI

In this phase you send us a request for information (order@murb-space.com). We analyze the information you send us and prepare a set of information about our 1D MGSE.

Up to 1 week

Phase 2: Order

In this phase you order the 1D MGSE. We present the proposal of implementation. When you approve the solution, the payment is being made.

Up to 1 week

Phase 3: Development

We begin the development process where we build the 1D MGSE for you.

Up to 3/5* weeks

Phase 4: Delivery & Installation

In this phase we deliver your 1D MGSE to you! The device can be installed by yourself or we can do it for you***.

Up to 1** week

* - 3 weeks is the usual time. 5 weeks is in case of more challenging requirements and/or unforeseen circumstances.

** - it may vary due to the shipment time and the customs.

*** - with an additional charge.
